We would like to invite you to submit a paper to the workshop:

### **ADVANCES IN STRUCTURAL SHOCKS IDENTIFICATION**

The workshop will run for 2 days and will take place on June 14-15, 2022, in Barcelona.

Under what conditions structural macroeconomic shocks can be identified with empirical time series models? Several influential papers have shown that, in many theoretical models, Structural VAR analysis is unable to correctly estimate the economic shocks of interest and their propagation mechanisms. This has sparked an important research effort in trying to understand the conditions of validity of structural macroeconomic analysis using time series models, and new techniques to identify structural shocks have been developed. The workshop aims at bringing together researchers and scholars working in this field to share ideas and contribute to the debate.

The deadline for submissions is **February 28, 2022**. To submit a paper, please use this link <https://app-summerforum.bse.eu/>. Submissions should include either a full paper or an extended abstract with the main results. Authors chosen to present papers will be notified approximately by the end of March. A preliminary program will be announced by the end of April.

Please note that the BSE Summer Forum is a series of independent workshops. When you submit your paper, you will be able to see the topics and dates of other workshops that will take place within the Summer Forum. The same paper cannot be submitted to more than one workshop, but you are welcome to submit a different paper to another workshop.

There is no registration fee, and meals during the workshop will be provided for participants. The workshop organization **will not be able** to provide accommodation or travel support for speakers.

The workshop is funded by the Spanish Ministry of Science, Innovation and Universities (PGC2018-094364-B-I00) and the Universitat Autònoma de Barcelona.
